

Project Engineer

Are you looking to jump-start your career in civil engineering, or are you seeking a new challenge?

IMS Infrastructure Management Services (www.ims-rst.com) is looking for an engineer with the right blend of technical capabilities, desire to learn and leadership skills to join our growing team in Tempe, AZ or Rolling Meadows, IL. IMS is a national leader in providing pavement and right of way asset management services to municipalities across the United States and Canada.

Essential Functions and Duties

This is an entry level - growth position whereby the proponent works with senior team members to learn the technologies used by IMS – both in the field and office, to collect and process pavement performance and right of way asset data. Once the technologies are understood, the engineer is expected to be able to handle all aspects of managing the flow of data and projects. The successful candidate will have a sound technical background in the areas of municipal engineering, roadways and database management, and be willing to take on a diverse set of tasks ranging from reviewing field data, to analyzing and reporting on it, to delivery to our clients. The successful candidate will bring to IMS strong communication skills, both written and verbal, along with excellent interpersonal abilities.

Experience with common software applications such as Word, Excel, Access, SQL, FoxPRO and GIS/GPS are a must. Additional responsibilities include:

- Completing project documentation and developing field survey requirements.
- Tracking and managing data flow including QA/QC.
- Client interaction, overseeing field testing and interfacing with sub-consultants.
- Operation of various software applications, data loading and report writing.

Education and Experience Requirements

Bachelor of Science in Civil Engineering plus a minimum of 1 year of experience is preferred. Direct experience in the field of pavement management is not required as we will provide technical training. Registration as an Illinois or Arizona PE is not initially required, as it can be in any of the 50 states (or as an engineer-in-training), with the eventual goal of getting an Arizona or Illinois P.E. as soon as possible.

Position Requirements

While in the office, this position will require the proponent to be sitting and operating a computer at a standard workstation. There will be moderate travel in the U.S and Canada. A valid passport for entry to Canada is required. Canada has strict entrance requirements so all proponents should review them, to ensure they can travel to Canada. A valid driver's license with no more than two moving violations in the past three years is required with no convictions

for DWI/DUI's. The final candidate will be required to pass a drug screen and will have to pass a background check.

To apply for this challenging position, please submit your resume complete with a formal cover letter to adavis@ims-rst.com. The cover letter will need to include confirmation that you meet all the position requirements, salary expectations and a detailed explanation of how your addition to the IMS team can help us grow. Resumes submitted without a cover letter will be rejected.

IMS is an equal opportunity employer. Relocation allowance will not be provided. IMS will not support any visa applications.
